THF Firehouse of Trojan 583																																																								

We are very proud of the information that we give our customers. We know you will see catalogs and flyers from other cattle breeders. Most will not include the actual weights and actual gains. We DNA test all of the bulls and then they are included in the EPD's. We want to provide you with all of the tools you need. We feel these bulls have merit good enough to raise your herd average and profit.
